2

STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

Applicants conducted an in-person interview with the Examiner on November 4, 2004. During the interview the Applicants' amendment filed on June 3, 2004 was discussed in view of the prior art of record. It was agreed that the prior art of record does not teach or suggest an oral dosage formulation having a coating comprised of pore forming agents of distinct size and proportion in the coating which imparts properties that produce a balanced solubility. Neither does the prior art teach or suggest a porous coating with the above-recited qualities that provides good mechanical strength requiring a force of from 18 N to 27 N to break, as compared to a force below 1N, while enabling desired controlled release patterns to be achieved.
